## QUICK GUIDE

## How to **Search BioCentury**

Learn how to navigate and search over 30 years of our original content.

# BioCentury Search

BioCentury Search is where all original articles – from over 30 years of publishing – are stored.

- 1 To access the Search page, click the **magnifying glass** on the top-left corner of the website. You may also initiate a search by **typing** the **keywords** you would like to explore in the **search field** from anywhere on the website, not just from the Search page

You can search for anything of interest to you and filter by Category, Publication Date, Company, Product, Molecular Target, Disease Category or Content Type

- 2 The **Category** and **Content Type** filters use checkboxes. You can select as few or as many as you like
- 3 The **Publication Date** filter has selections for Any, Past 7 Days, Past 30 Days, Past 12 Months and Range. The search will default to Any. You can enter two dates for the search to pull between when Range is selected
- 4 The **Company**, **Product**, **Molecular Target** and **Disease Category** filters use predictive text search fields. As you type in the search field the results will narrow down. You can type the entire name or stop and select the option you are looking for when it appears

# BioCentury Search *cont.*

- 1 This is what the search will look like with the filters selected

If you have an **Archives subscription**, you will be able to view all the articles we have ever published. If you do not have an Archives subscription, you will receive the past 90 days' worth of articles

The screenshot displays the BioCentury search interface. On the left, a 'FILTER BY' sidebar is visible with the following settings:

- CLEAR ALL FILTERS** (button)
- Search Headlines Only
- CATEGORY** (dropdown arrow)
- Commentaries
- Data Byte
- Deals
- Discovery & Translation
- Distillery
- Emerging Companies
- Finance
- Management Tracks
- Market Access
- Politics, Policy & Law
- Product Development
- Regulation
- PUBLICATION DATE** (dropdown arrow)
- Any
- Past 7 Days
- Past 30 Days
- Past 12 Months
- Range
- 07/19/2022 (input field)

The main search area at the top includes a search bar with the text 'Search...', a 'Save Search to Workspace' button, and a 'Search Tips' link. Below the search bar, a yellow box highlights the active filters: 'Deals', 'Discovery & Translation', 'Emerging Companies', 'Jul 19, 2022 - Sep 19, 2023', and 'Gilead Sciences Inc.'. A blue circle with the number '1' is positioned over the filter box.

The search results are displayed in a list format under the heading 'ANALYSIS (85)'. The results include:

- AboleriS: testing an antibody to kill effector T cells tied to autoimmunity** (University of Nantes spinout heading toward clinic with €27.3M from international syndicate)
- Mini Cas protein iterations; plus Moderna's Lassa virus vaccine and more** (BioCentury's roundup of translational innovations)
- Sept. 12 Quick Takes: Exelixis takes rights to Insilico's synthetic lethal molecule** (Plus: Vertex, Septerna in GPCR deal and updates from Pierre Fabre, Vertical, Traverse, Gemmat, Neurocrine, Rome, Cymabay)
- Actio seeks rare toeholds into common diseases with \$55M A round** (Led by geneticist David Gottstein, the San Diego company makes its 'one-to-many' strategy build the economic case for going after very rare diseases)
- Arialyt: targeting autoantibodies for CNS diseases, including rare encephalitis** (With \$58M seed round, Avonon-incubated start-up will also develop former Astellas antibody for other indications including psychosis)
- East-West CAR T deals, FTC-Amgen and more: BioCentury's latest podcast** (Analyzing opportunity for cross-border CAR T collaborations; what's next for the FTC on biopharma M&A; and how a COVID deal clears path for Bortezomib in Senate)

# Searching Tips

- 1 If needed, you can select the **Clear All Filters button** to remove everything you have set for this search using the left-hand Filters menu. Otherwise, select the **X to the right of each filter item** to remove them one by one

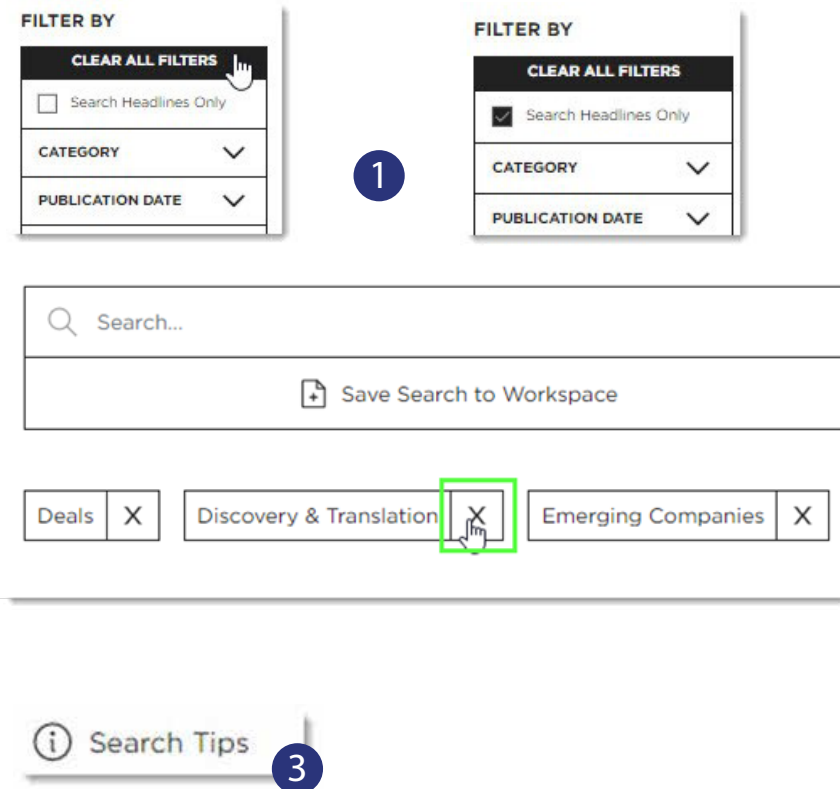

Checking the **Search article headlines only** box will search only the titles of articles, not the full text

- 2 You can use (**AND, OR, NOT**) to narrow or broaden your search. Make sure to use **ALL CAPS** when using these operators.

For an exact match, enclose your search term in **double quotes** (e.g., “lung cancer”)

Stemming (for example, searching develop also finds developer and developing) is applied automatically

- 3 If you need a reminder of these tips while using the BioCentury search, just click the **Search Tips** option next to **Save Search to Workspace**
